DEVELOPED SOFTWARE/SYSTEMS

LibraNet

Computer Programming 2 | Academic Project

- Desktop library management system that automates book borrowing and inventory tracking.
- Developed using: Java.
- Role: Solo Programmer.

QuickServe

Software Engineering | Academic Year 2025–2026

- Web-based point-of-sale dashboard designed to streamline order-taking for restaurants using manual processes.
- Developed using: HTML & CSS.
- Role: Partnered Programmer.
- Team: Two-person team.

TwinFall

Game Programming | Academic Year 2025–2026

- Narrative-based game where a character travels between underworld and overworld realms to reunite with its twin, Luna.
- Role: Creative Director & Lead Artist.
- Responsible for visual assets and core game design.

Mango Shake Simulator

Game Programming 2 | Academic Year 2025–2026

- 3D simulator game where players act as a mango shake vendor and must meet daily order quotas to progress.
- Features anomaly-based punishments when quotas are not met, increasing challenge and immersion.
- Role: 3D Artist — modeled characters, objects, and environments; performed rigging and texturing.
- Team: Four-member development team.

Galaxias Mania

Game Technology | Academic Year 2025–2026

- 2D mobile space shooter focused on achieving high scores and surviving continuous enemy attacks.
- Role: Game Developer (pair project).
- Team: Two-person team.

HAVEN – Emergency Response Dashboard and Mobile App

Academic Year 2025–2026

- Real-time emergency response system where mobile user reports instantly trigger alerts on a desktop dashboard.
- Role: Front-End Developer; assisted with Back-End development.
- Team: Two-person team.

Renthing – Rental Marketplace

Startup Project | DTI Moonshot Startup Competition (Bacolod City, Region VI)

- Rental marketplace platform promoting access over ownership by allowing users to browse and request rental items and services.
- Competed as a city-level finalist in the DTI Moonshot Startup Competition.
- Role: Front-End & Back-End Developer; UI/UX Designer.
- Team: Two-person team.

Prospera.AI

Technopreneurship | Academic Year 2025–2026

- AI-powered mobile wallet application promoting smarter financial management using artificial intelligence.
- Features include expense tracking, all-in-one wallet, AI chatbot, and savings envelopes.
- Role: UI/UX Artist.
- Team: Five-member team.

MJIPHIL Construction — Inventory Catalog System

Cloud-Based Application Development | Academic Year 2025–2026

- Web-based digital inventory and catalog system developed to replace manual inventory counting processes.
- Includes Admin and User modules: Admins manage products, inventory, and orders; Users browse the catalog and place orders.
- Role: UI/UX Artist.
- Team: Six-member team.
